

theCODEBREAKERS

an international free online cryptology game

TAKE ON THE CHALLENGE,
JOIN THE GAME

TheCODEBREAKERS - an International Cryptology Game is about to start!

Become a secret agent, break enemy messages and win the prizes! Just register your team and join the game!

Why we play?

In 1929, the Cipher Course began in Poznań. Its participants, three Polish mathematicians, did the impossible three years later - they broke the cipher of the German military encryption machine, Enigma. This fact contributed to the Allied victory in World War II. Today everyone can become an adept of codebreaking...

How does it work?

During the coming stages of the game, lectures and tasks testing your ability to encrypt and break ciphers will be published. The game is available in three difficulty levels: TRIAL, BASIC and ADVENTURE. The game lectures are published in English (and in German, Spanish, French, Russian and Polish). The tasks are in English.

Right now

Register your team, read lectures, solve the cryptological puzzles and win the game!

WILL YOU BE THE FIRST TO BREAK THE FINAL CODES?

Dołącz do nas na www.thecodebreakers.org!

Good luck!
